## Project Summary

### Objectives

Adapting to technological change and evolving demands of the labor market, HE pedagogies must evolve to activate HE students. HEIs need to reshape course and task design and offer multidimensional learning opportunities for all. The project promotes innovative teaching aligned with Education 5.0, integrating generative AI as pedagogical tools, fostering inclusive leadership skills, redesigning HE learning environments, creating courses, and training educators able to guide and motivate others.

### Activities

Redefine pedagogical digital framework for Education 5.0 while embracing AI-assisted pedagogical potential; develop and co-teach inclusive HE courses on visionary leadership skills integrating AI as a pedagogical tool; create and pilot interactive multimedia open access resources more suited to younger generations, including e- and m- m-learning content; hold transnational trainings, workshops, blended programs and a conference for educators, students and stakeholders.

### Impact

A pedagogical framework, 4 national and 1 transnational reports on transformative pedagogies, including AI assisted tools, a set of 5 modular interactive e-books on leadership skills accessible as OERs, 5 certified or approved modular courses, consisting of approx. 40 modules in total, activating employability and leadership skills, 2 transnational teacher and student trainings, 3 international workshops on Integrating Education 5.0 and AI, and an international conference.
